TyRex Celebrates the 1st American Manufacturing Revolution's Independence Day as America Turns 250

Capitalizing on the success of its **Patriot's Day Celebration**, TyRex once again opened its doors to the public for a very special **American Manufacturing Independence Day Celebration**. The celebration focused on TyRex's manufacturers of tomorrow and the knowledge and tools needed to succeed in advancing technology and manufacturing into tomorrow.

25 tour stops with full American patriot flair and some stares as visitors transition through the TyRex technology facility. To commemorate the day, TyRex unveiled a six-foot-tall **Declaration of Manufacturing Independence** sign! Also of note, TyRex's **Wheel of Technology Fortune** featured new prizes including specialty coinage direct from 2 mints, solid gold coins and unique challenge coins. Throughout the day-long event, students, educators, journalists, young entrepreneurs, and other Austinites visited the facility. The tour included additive manufacturing demonstrations, a collection of technology labs and its substantial dinosaur museum.

Halfway through the day, celebrants tuned in to a special video presentation and inspiring words from TyRex leadership. From there, everyone lined up to enjoy classic American cuisine. Special thanks to Austin Reliability Labs' General Manager, **Jason Dunbar**, for manning the TyRex grill to serve up a cheeseburger and hot dog lunch made with appreciation. After lunch, the TyRex Family gathered for its highly anticipated summertime bag toss competition. "Spending time with my coworkers and the friendly competition are what I like most about our Independence Day celebrations," shared iRex Engineering Manager Denny Hean after placing first in the bag toss competition. **"Winning is great, but it's the shared fun that defines our TyRex culture and makes our company events worth looking forward to!"**

Stopping short of literal fireworks in the parking lot, the TyRex Family concluded its traditional Independence Day celebrations and pivoted its focus back to manufacturing's rapidly evolving future.

Coach's Corner

John Bosch, Jr.
Coach, Mentor and TyRex's Technology Visionary

Over the last 3.5 years, I have led a research group collectively named the **TyRex T³ Technology TEAM**. Our focus was on combining 3D printing with Artificial Intelligence, or "AI" for short. Our primary purpose was to focus on keeping manufacturing opportunities in the U.S. While many believe AI will be used to replace and/or eliminate jobs, on behalf of the TyRex Technology Family, I am personally very proud that the **TyRex Technology Family**, composed of the Nine (9) **TyRex Technology Entities**, Five (5) **TyRex Technology Associate R&D Entities** and **RecognizeGood.org**'s four (4) community programs, is using AI for the Good of our communities and in creating both new business opportunities and more specifically manufacturing jobs, as illustrated in this edition of the *Tribune* front page and the article covering TyRex Interns on page 6.

Additionally, I have personally investigated the advancing tsunami of technology and co-published articles on ***Technology Time*** with Reina Wiatt. It is believed that the world's knowledge is now doubling every half hour. The compounded annual growth rate is astronomical. It is hard to get your mind around compounding 48 times a day, 365 days a year. Think about this: a leap year adds another 48 doubling of the world's knowledge - incredible!

While working on an AI-aided music video entitled ***Salute to Uncle S.A.M. (Spirit of American Manufacturing)*** with Drew Donnelly, AI on its own coined the following phrase:

"Knowledge grows faster than time can turn."

I continue to ponder whether AI has rights to the copyright. But what I truly believe the meaning of this phrase refers to is a time in the near technology future when knowledge is already old and outdated before we receive and review it.

By the end of this year (December 31, 2026), it is the goal and stated ambition of the **TyRex T³ Technology TEAM** that we can change the narrative and the very nature of business, education and especially manufacturing, along with a number of other game-changing programs, especially ones that connect and benefit our communities through our **FIVE STARS** Community Partnerships developed under a TyRex customized program titled **TyRex Venture Philanthropy**.

My *Coach's Corner* closing words on behalf of my TyRex Technology Family, TyRex T³ Technology TEAM and my TyRex Partners and myself is our shared pledge to only use AI for the good of our American Manufacturing nation, our communities and to each person who identifies themselves as a TyRex Technology Family member.

And Matt Ache, thank you for being Andrew's and my partner for over 30 remarkable TyRex partnering years.

As always, *Thanks for Listening!*

John Bosch Jr.

In Other RecognizeGood GOOD News...

Legend Ceremonies

This quarter, RecognizeGood illuminated the stories of **Antony Jackson** of **We Can Now** and **Amy King** of **Make-A-Wish Foundation Central & South Texas**! As RecognizeGood's newest volunteer legends, Antony and Amy each received a $1,000 pay-it-forward donation along with a dedicated brick along the Lady Bird Lake trail honoring their lasting impact within the Austin community.

Antony's Story

Antony Jackson of We Can Now creates sustainable pathways out of homelessness for hundreds of individuals each year, meeting them where they are and giving them a hand up through his own lived experience.

For more than 20 years, Amy King has helped bring hope, strength, and joy to local children facing critical illnesses as a "fairy godmother" through Make-A-Wish Central & South Texas.

Amy's Story

Lighthouse Presentations

RecognizeGood shared the inspirational stories of three extraordinary nonprofits this quarter. **Nonprofit Austin**, **Leander ISD PTA Clothes Closet** and **Bee a Savior** are RecognizeGood's newest Lighthouse Award winners for their widespread impact throughout the Austin community and beyond! Each Lighthouse awardee receives a $1,000 donation and a special certificate in honor of their recognition.

Nonprofit Austin started in 2000 with a class of six nonprofit professionals learning how to support volunteers online, and 25 years later has evolved into an essential hub for nonprofits across Central Texas.

Nonprofit Austin's Story

LISD PTA Clothes Closet's Story

With 4,000 hours already volunteered during one school year alone, the Leander ISD PTA Clothes Closet has been supporting their district for over 40 years, providing clothing to students in need with no income or voucher requirements.

For eight years, Bee A Savior has educated more than 12,500 community members on the importance of bees as part of the environment and how to protect them, expanding internationally into 13 countries and counting!

In Other TyRex Good News...

TyRex Interns Make a Lasting Impression with New Products Moving Forward 10 Provisional Patents

This year's group of 20 paid student interns reminded us that using their CAD design and engineering skills, AI software and 3D printing to create new products with real-world impact. In addition to gaining on-the-job experience, interns received the pay and opportunity to be included on provisional patents. So far, we are proud to announce that we have filed our first official U.S. patent on a new product designed and engineered by one of our interns and included their name on the provisional patent!

Pranav Sriram

"I learned a lot! Not just how to 3D print, but also about the industry and what it's like to work in the manufacturing environment.

Daniel Roepke

"This experience gave me a much deeper understanding of mechanical design, additive manufacturing, and the iterative engineering process.

TyRex Donates Backpacks to Elementary Students

The TyRex Family is proud to continue partnering with **Rotary Club of West Austin** to supply 50 backpacks to the students at **Wooldridge Elementary School** each summer. Thank you to our partners at West Austin Rotary Club for helping get essential school supplies to this year's students!

TyRex Nominated for Top Mentor Award

TyRex was nominated for **Skillpoint Alliance**'s Top Mentor Award during its annual Partner Award Luncheon. There, TyRex joined fellow manufacturers and Austin businesses in celebrating strides made in workforce development and the industry's future!

TyRex Family Independence Day Celebration

Check out our Facebook Album!

America turned 250 this July and the TyRex Family celebrated with its traditional bag toss and barbecue lunch along with a special facility tour that connected to **TyRex's American Manufacturing Independence Day Celebration.**

TyRex Family Dinosaur Museum

Authentic Artifact of the Month

JULY

Roman Byzantine Anti-Cavalry Arrow

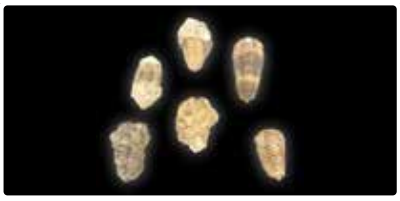

During the Eastern Roman (Byzantine) Empire's nearly 1,100-year rule, its army became expert at adapting to rapidly changing environments and enemy forces. This arrow was designed to defend against devastating cavalry charges.

AUGUST

Trilobite Group

Trilobites lived for nearly 300 million years and became extinct before the age of dinosaurs, 251 million years ago. Scientists have identified over 20,000 species of trilobites and while the typical size was around 1-3 inches long, they ranged as tiny as under 1 millimeter up to nearly 30 inches long.

SEPTEMBER

Flying Eagle One Cent

This 1858 coin was discovered in Gettysburg, PA and depicts a flying eagle. Coins made of gold, silver and bronze were scarce and hard to come by during this part of the 19th century due to their rarity; despite the complexities of using paper money, many people stored away their collections of precious metals.

AI and The Future of Manufacturing Course with Satwinder Kahlon

Now Available to all TyRex Family Members and temporary employees that have completed over 1 year of employment

TyRex's new AI training course is designed to help you understand and make the most of these new tools. You'll learn practical ways AI can take over repetitive tasks, freeing up your time for more creative, meaningful, and strategic work. AI is not here to replace jobs; it's here to support you, strengthen your skills, and make your day-to-day work easier. A better understanding of AI will also boost your confidence, open doors for career growth, and keep your skills current in a fast-changing workplace. For the company, it means smarter decisions, greater efficiency, and better service to our customers.
